The conference was well and efficiently run that attended the conference were required to eat and sleet in which the conference was held. Meetings took place at night. Plans were formulated for the expansion of the telephorarticularly in South China. As a result of these placed one-half after the conference long distance open Canton to the land adjacent to Hainan Strait. Communication to the land adjacent to Hainan Strait. Communication to the land adjacent to Hainan Strait. Communication with Hainan by radio telephone and telegraph. This communication would have taken around six months one month and a half. Also as a result of the conference lines between Canton and Hankow were put into go At the conference plans were discussed and formulated and regrouping of the telephone and telegraph administration.	rstems. The conference was ications particularly in South by General Chung. All who ep in the building in Canton ce both during the day and hone and telegraph system lans within about a month wire lines were erected from hication was established job prior to the advent of to accomplish instead of rence the open bod working order. 50X1-H of the reorganization stration with control
2.	improvement of the Chinese telephone and telegraph systemed by around 200 Chinese concerned with communications. The conference was well and efficiently run hattended the conference were required to eat and sleet in which the conference was held. Meetings took place at night. Plans were formulated for the expansion of the teleph particularly in South China. As a result of these pland one-half after the conference long distance open Canton to the land adjacent to Hainan Strait. Commun with Hainan by radio telephone and telegraph. This communist control would have taken around six months one month and a half. Also as a result of the conference lines between Canton and Hankow were put into go at the conference plans were discussed and formulated and regrouping of the telephone and telegraph administrative at Peking. At the conference Training Committees were established each province and a detailed training program was discontralized at Peking.	restems. The conference was leations particularly in South by General Chung. All who exp in the building in Canton ce both during the day and hone and telegraph system lans within about a month wire lines were erected from mication was established job prior to the advent of to accomplish instead of rence the open bood working order. 50X1-H of for the reorganization stration with control sed as far as possible for scussed in which the learning on of practical telephone and to formulate plans and make ers. It was decided that all tic rotary switching systems,
2. 3. 4.	improvement of the Chinese telephone and telegraph systemed by around 200 Chinese concerned with communications. The conference was well and efficiently run that tended the conference were required to eat and sleet in which the conference was held. Meetings took place at night. Plans were formulated for the expansion of the telephonarticularly in South China. As a result of these pland one-half after the conference long distance open canton to the land adjacent to Hainan Strait. Communwith Hainan by radio telephone and telegraph. This communist control would have taken around six months one month and a half. Also as a result of the conferwire lines between Canton and Hankow were put into go at the conference plans were discussed and formulated and regrouping of the telephone and telegraph administratized at Peking. At the conference Training Committees were established each province and a detailed training program was discontralized at Peking. At the conference Training Committees were established each province and a detailed training for the solution of theory was minimized, and training for the solution of theory was minimized, and training for the solution of the conference Technical Committees were set up to recommendations on technical telecommunications matter and critical in China should be equipped with automate smaller cities with step-by-step magnetic control systems.	restems. The conference was leations particularly in South by General Chung. All who is the building in Camton ce both during the day and hone and telegraph system lans within about a month wire lines were erected from mication was established job prior to the advent of to accomplish instead of rence the open bod working order. 50X1-H of for the reorganization stration with control sed as far as possible for scussed in which the learning on of practical telephone and to formulate plans and make ers. It was decided that all tic rotary switching systems, stems, and manual magneto equipment for the Chinese and controlled general available community the Chinese Community by the Chinese Community
2. 3. 4.	improvement of the Chinese telephone and telegraph systemeded by around 200 Chinese concerned with communications. The conference was well and efficiently run attended the conference were required to eat and slee in which the conference was held. Meetings took place at night. Plans were formulated for the expansion of the telephoraticularly in South China. As a result of these places and one-half after the conference long distance open Canton to the land adjacent to Hainan Strait. Communist Communist control would have taken around six months one month and a half. Also as a result of the conferwire lines between Canton and Hankow were put into go and regrouping of the telephone and telegraph administratized at Peking. At the conference plans were discussed and formulated and regrouping of the telephone and telegraph administratized at Peking. At the conference Training Committees were established and province and a detailed training program was discontralized at Peking. At the conference Technical Committees were set up to recommendations on technical telecommunications matter theory was minimized, and training for the solution telegraph problems was emphasized. At the conference Technical Committees were set up to recommendations on technical telecommunications matter than the conference technical telecommunications matter smaller cities with step-by-step magnetic control systems would only be employed in the rural areas. It was decided at the conference that all buying of telephone and telegraph systems would be centralized from Peking. Moreover, it was decided that all buying manufacturer and not through brokers or dealers. How cations equipment, even old equipment, was purchased	restems. The conference was ications particularly in South by General Chung. All who see in the building in Canton see both during the day and show and show and the legraph system lans within about a month wire lines were erected from hication was established job prior to the advent of to accomplish instead of rence the open bood working order. 50X1-H of for the reorganization stration with control sed as far as possible for scussed in which the learning on of practical telephone and to formulate plans and make sers. It was decided that all tic rotary switching systems, stems, and manual magneto sequipment for the Chinese, and directed and controlled should be direct from the wever, all available communi-
